# Why We Should Be Your Manufacturer

**We Are a Fully  
Integrated  
Contract  
Manufacturer  
for the  
Nutritional  
Supplement  
Industry.**

# Our Supplement Manufacturing Certifications

**Good  
Manufacturing  
Practices**

**GMP CERTIFIED**  
NSF/ANSI 455-2  
Dietary Supplements

# Our Supplement Manufacturing Certifications

- **FSMA (Food Safety Modernization Act) Compliant:** FDA-registered company, meeting FSMA standards for safe production of food and dietary supplements in the U.S.
- **FSVP (Foreign Supplier Verification Program) Compliant:** Ensures raw materials from foreign suppliers meet the same safety standards as domestic ingredients.
- **Food cGMPs Title 21 CFR Part 117 Compliant:** Adheres to federal regulations for food safety and preventive controls, with multiple Certified Preventive Control Qualified Individuals (PCQIs).
- **California Process Foods Registration:** Holds an Organic Processed Product Certificate for dietary supplements and is certified to operate by the State of California.

# R&D Innovation & Efficiency

- Custom supplement formulation and regulatory compliance
- Dosage form development (tablets, capsules, softgels, powders)
- Specification setting for quality, consistency, and safety
- Pilot lab for efficient formulation testing and scale-up
- Flavor and sweetener optimization for better consumer appeal
- Full in-house lab for streamlined R&D and product refinement

# **Rapid, Reliable Production**

**State-of-the-art FDA-registered,  
USP certified, cGMP facility**

**Trusted by the nation's largest retailer brands**

# Large Scale Supply & Distribution

- New 80,000 sq. ft. distribution center
- Fully integrated supply chain
- Expanded docking facilities
- Streamlined warehouse and logistics operations
- Optimized inventory management
- Safe, efficient product storage and distribution
- Reliable support to keep your supply chain running smoothly

# Packaging, Bottling, and Filling Capabilities

- Comprehensive packaging and bottling solutions for powders, tablets, and capsules
- Bottling options in HDPE, PET, and glass
- Custom packaging: compact bottles for tablets and capsules, large canisters for powders
- Filling services available for stick packs containing powders

# Quality Confirmed

- New 10,000 sq. ft. state-of-the-art laboratory and testing facility
- Testing follows USP standards and internal methods to ensure consistency, safety, and effectiveness.
- Potency is verified using HPLC, UPLC, ICP-MS, ICP-OES, and wet chemistry methods.
- Microbiological quality is ensured using USP, FDA-BAM, AOAC, and rapid validated methods.
- Heavy metals are screened with ICP-MS to detect trace contaminants and maintain purity.
- Stability is assessed through accelerated and real-time testing to confirm shelf life.
